

species
shape + colour = guild

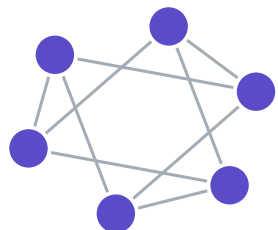

pairwise coevolution
reciprocal selection

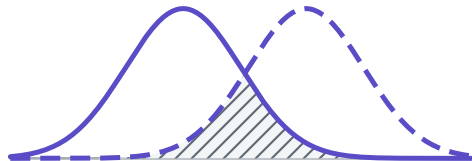

one species, its guild
focal link in ink

bipartite community
links only across guilds

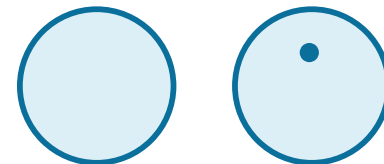

one guild (diffuse)
everyone can meet everyone

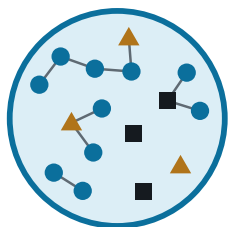

niche overlap
hatched = competition

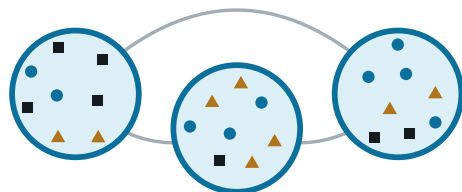

landscape
the same system, many places

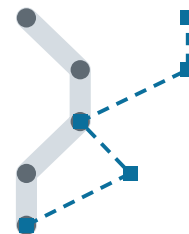

host · host + one microbe
a unit that contains its partner

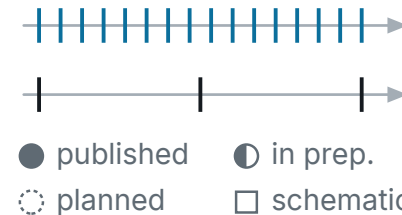

host + microbiome
marker shape = taxon

hosts-microbiome
hosts as patches; contacts as edges

lineages
band = host · dashed = microbe

fast / slow · status marks
